Hevnlee Alpacas

The Hevnlee herd was carefully developed from a strong foundation of elite quality suri alpacas, sourced originally from Surilana and Pinjarra. We have been very successful in the show ring. Our animals have won numerous broad ribbons, including many Supreme Champions.

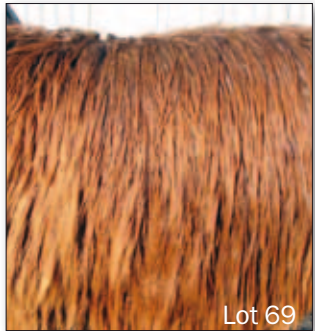

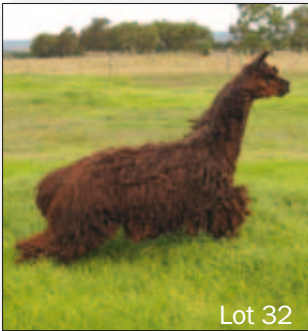

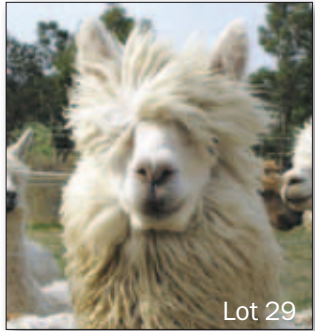

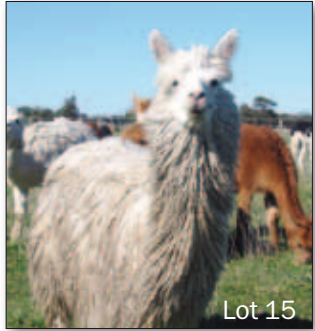

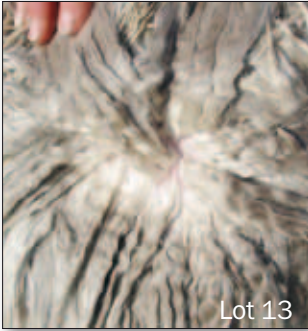

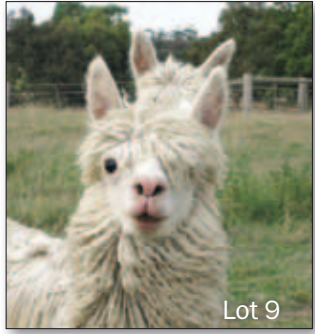

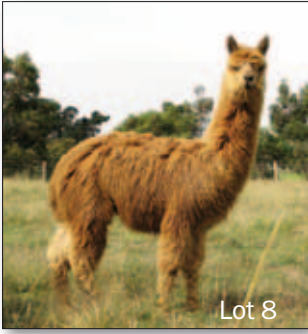

In recent years work commitments have required Pauleen to spend several months each year overseas. While Ron was able to maintain the stud, campaigning animals in the show ring was impossible.

As Pauleen's international commitments continue to grow, we have decided to part with our large equestrian property and reluctantly offer for sale our entire herd of spectacular suris. Most animals have full suri pedigrees based heavily on Surilana bloodlines. They easily rank amongst the very best suris in Australia. Many are dual registered with AAA and AABA.

These animals represent an outstanding opportunity to start at the top in suris, renowned for their unusual fleece structure and striking lustre. We reluctantly offer them for unreserved sale and sincerely hope that our customers enjoy owning these animals as much as we have.

2010 Fleece: 29.2 M 4.7 SD 16 CV 65.3 CF
 Mating: Hevnlee Sparkling Zircon (SW Suri) Last Mating: 15/03/10

Comments: Lily has a pedigree to write home about, with Surilana Icalon as her sire and Surilana Miattia as her dam. What her fleece lacks in fineness it makes up for in lustre, which she now passes on to her stunning cria.

2010 Fleece: 28.9 M 4.8 SD 16.7 CV 67.4 CF
 Mating: Hevnee Sparkling Zircon (SW Suri) Last Mating: 18/04/10

Comments: We took a risk on this girl and put Surilana Icalon on both sides of her pedigree. The result was a fleece with plenty of lustre that has now been passed onto her first cria. She's been mated back to a Zosimo son to add even more density to her next cria. The result should be outstanding.

 Jolimont Rose (MRB W Huacaya)

2010 Fleece: 22.7 M 5.1 SD 22.3 CV 93.4 CF
 Mating: Hevnlee Wylde Mahogany (SDBR Suri) Last Mating: 17/05/10

Comments: Diana has an unusual story. Her mother was paddock mated after Diana was born and, eleven months later, both Diana and her mother produced babies, meaning that Diana became pregnant when she was just three months old. Despite her best efforts the cria died, but our teenage mum is now pregnant again and hoping for a better outcome this time.

2010 Fleece: 22.2 M 4.5 SD 20.3 CV 94.9 CF
 Mating: Not yet mated

Comments: This girl is very well bred and has a lovely fleece but was born with a congenital muscle problem in one leg. There is no family history of the problem and she manages OK, but we've chosen not to breed from her. Someone else might be prepared to take the risk or, alternatively, she's a great babysitter with a lovely gentle temperament.
